

**D A V I D   J I M É N E Z**

## **PROFESSIONAL SUMMARY**

David has 18 years of professional practice working as an architect. During the first 15 years of his career, he practiced architecture in Colombia where he is a licensed architect. He moved to the United States in 2015 and he started his process of becoming a licensed architect in Washington DC. David's architectural style is the product of his wide expertise in a different array of projects including multi residential, education, healthcare, transportation, commercial and office architecture. His ability to solve architectural and design problems is one of his most remarkable qualities and also the ability to understand and interpret the client's desires, responding with innovative professional architectural solutions. David has the ability to work as a leader in a team and also is an excellent team player. Since 2008 David has worked as an independent architect creating a very wide International portfolio under his name, including projects in different cities of Colombia, Guatemala, Mexico City, Panama City and The United States. During his independent practice he developed marketing skills learning how to market his own work. His bilingual ability allows him to serve not only the American market but the Latin American community as well.
